

Women in Leadership Mid-Michigan has grown very quickly over the past few years and finally needed a complete redesign of their website, including new capabilities and a new brand. We built a [social networking membership website](#) to enable networking among the members and an easy way to "get business done." Members have their own username and password.

Once they login, members have access to ...

- Update their profile, photo, and contact information.
- Register for upcoming meetings and events.
- Post news and information in the discussion board.
- Connect with other members through the membership directory.
- Chat live online with other members who are currently logged in.
- Post comments and testimonials about every meeting.
- Renew their yearly membership subscription.
