

Rigger Lift, located in Flint Michigan, manufactures high capacity forklifts used by companies throughout the United States, Canada and Mexico for heavy lifting and machinery moving in the nuclear, manufacturing, industrial, and shipping industries. The images on their website homepage displays their most popular products, including the R Series and RC Series.

We created a new website for Rigger Lift that includes ...

- A homepage flash of their main truck products (scroll through the different trucks and click on any truck for more information)
- Online customer login to view truck dimensions
- Testimonial page for customers to submit their comments
- Blog for the owner to post his ideas and new truck locations
- A photo gallery that displays the quality products
- and much more!

Client Testimonial

"Rebecca brought our old and outdated website into the 21st century. She had fresh and exciting ideas for our website and ways to connect with prospective clients. All of our questions and emails were replied to in a very timely manner. I am very impressed by service we have received and would not hesitate to recommend her to anyone looking for someone to work on their website!" ~ Dirk Rinz, President, Rigger Lift
